Art Unit: 1614

Claims 14-20 and 23-26 are presented for examination.

A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

Claims 14-20 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1-7 of prior U.S. Patent No. 5,922,746. This is a double patenting rejection.

Claims 23-36 are rejected under 35 U.S.C. 112 first paragraph for the reasons set forth on pages 2 and 3 of the office action of July 3, 2002.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 24 and 26 recites the limitation "the compound having non-inactivating sodium channel blocking activity" in lines 1 and 2 of claim 24 and lines 2 and 3 of claim 26. There is insufficient antecedent basis for this limitation in the claim.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 1614

Claims 23-26 are rejected under 35 U.S.C. 102 (b) as being anticipated by Goldin et al. (U.S. Patent 5,403,861). Goldin et al. teach the use of the claimed compound, riluzole in a pharmaceutical formulation for the treatment of different conditions. See page 11, paragraphe 69. such use inherently prevents retinal ganglion cell death. See Ex Parte Novitski, 26 USPQ 2nd 1389 (BOPA 1993) illustrating anticipation resulting from inherent use.
